

# Wellington

Dear Families,

We have been getting many questions in the health clinic about when students need to stay home, and when siblings are required to stay home.

|   |  |  |
|---|--|--|
| <p><b>Your student should stay home from school if they have any ONE</b> of the following COVID symptoms: runny nose, nasal congestion, sore throat, cough, fever (100.4 or higher) ,or loss of smell or taste, unless there is an alternative diagnosis for one of those symptoms.</p> | <p><b>Your student should stay home if they have any TWO</b> of the following symptoms: headache, body new or worsened fatigue, nausea, vomiting or diarrhea. See attached Child In-Person Participating Algorithm).</p> | <p><b>Your student should stay home if <u>any person living in your household has any of the symptoms</u>.</b> Public health officials advise that the entire household needs to remain home until an alternative diagnosis is given or a negative COVID test is achieved.</p> |
|---|--|--|

For more FAQ and COVID-19 resources, visit our website at [wellington.org/covid19](https://wellington.org/covid19). We are here to support and help you. If you have any questions, please contact us in the school health clinic. The direct phone number is **614-324-1661** or you can email us at [wellness@wellington.org](mailto:wellness@wellington.org).

**Stay well,  
Danielle Goldfarb BSN, RN**

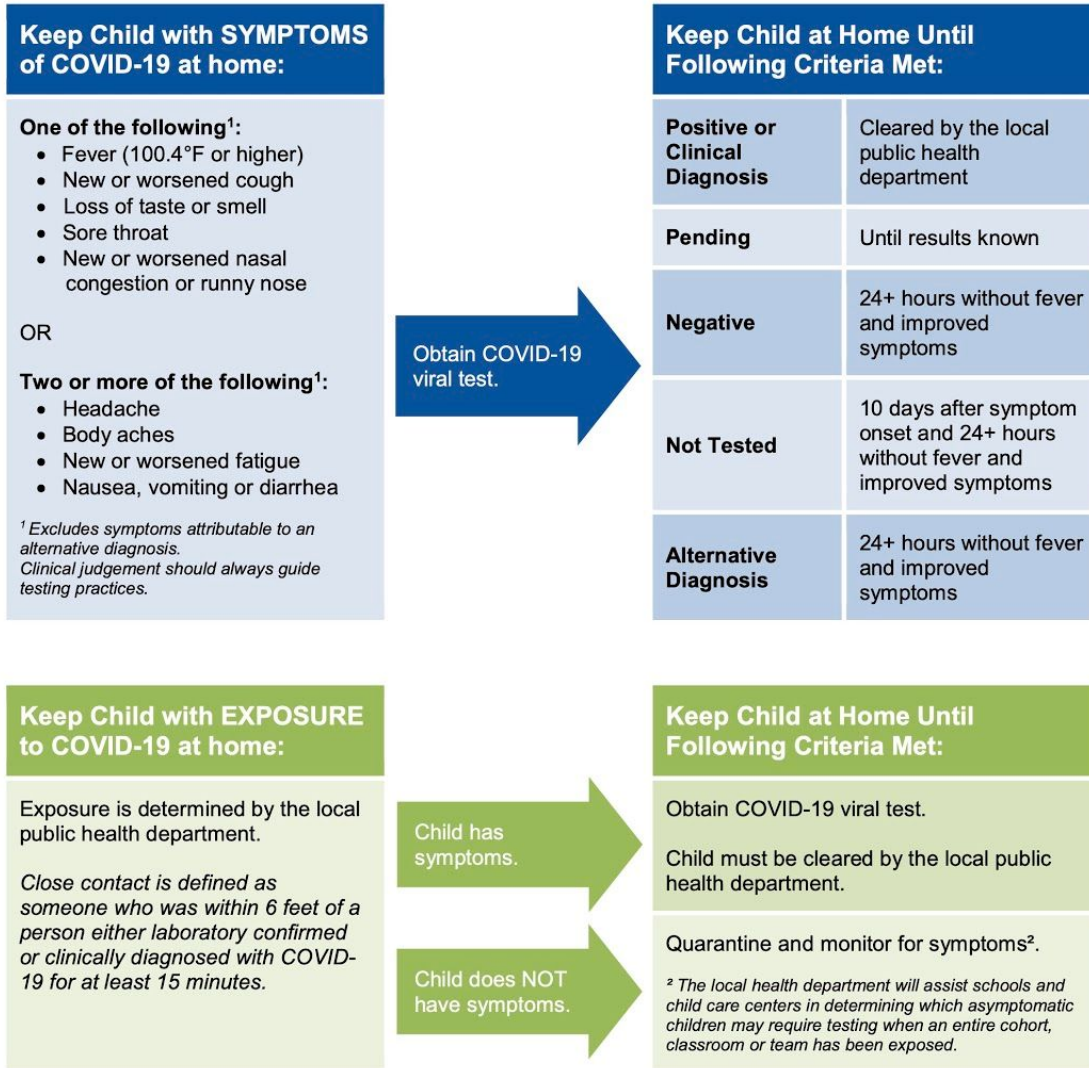

**Elizabeth Doolittle MSN, RN**

## Stay Home or Come to School Scenarios

|   |   |   |
|---|---|---|
| <p><b>Scenario 1:</b> Your 1st grader woke up with congestion this morning but does not have fever and is acting well otherwise. Should she stay home and should her 3rd grade brother stay home?</p> <p><b>YES.</b> Both children should stay home. Return to school when she has a negative COVID-19 test and symptoms improve. If no COVID test is obtained, she and her brother will remain home for 10 days. If a COVID test is positive - contact the school health professional at <a href="mailto:wellness@wellington.org">wellness@wellington.org</a> or 614-324-1661.</p> | <p><b>Scenario 2:</b> Your 6th grader woke up with a runny nose and itchy eyes. He is allergic to ragweed and usually has symptoms like this in the Fall which are documented in veracross. Should he stay home?</p> <p><b>NO</b> because he has an alternative diagnosis for his symptoms which are consistent with allergies.</p> | <p><b>Scenario 3:</b> Your son is in the 11th grade. He has an older brother that is a freshman in college. Your older son was home from college for Thanksgiving and had a low grade fever/cough. Now he is feeling much better. Can your 11th grader return to school after Thanksgiving break?</p> <p><b>YES.</b> If your college student had a COVID test and it is negative then your 11th grader may return to school. If your college student has not had a COVID test then your 11th grader needs to stay home for 10 days.</p> |
