

Sway is a mobile application used by medical personnel across thousands of organizations to objectively measure balance and cognition for concussion management.

Sway is an FDA cleared 510K Class II Medical device and is available on both iOS and Android devices.

All PHI data collected during the testing process is de-identified and stored in a HIPAA- and FERPA-compliant cloud.

## NEXT STEPS

### Download App

Use the QR code below or go directly to your device's app store to download the application on to the athlete's mobile device.

Download on iOS and Android

### Baseline Testing

Once the app is downloaded, your organization's medical professional (athletic trainer, physician etc.) will provide the testing code to activate the app. That code will enable the athlete to take a baseline assessment.

### Why Baseline Test?

Gathering objective baseline data when the athlete is healthy will provide healthcare professionals with valuable insight to manage concussions or other sport-related injuries.
